• FOIR = estimated monthly EMI ÷ estimated monthly income × 100.
• Only debits from this account are visible; obligations paid from other accounts are not included.
• Obligations are estimated from recurring debits only. They are not verified loan liabilities; outstanding principal, interest rate and sanctioned amount cannot be derived from a bank statement.
• Probable = narration names a lender or EMI/loan; Possible = unspecified recurring NACH/ECS debit. None of these is a verified loan liability.

No confirmed bounce events detected. No narration in this statement explicitly reports a returned cheque, failed mandate or bounce charge. This does not verify a clean repayment history: returns on other accounts, or narrations without return wording, are not visible.

Confirmed events are based on explicit narration. Pattern-based reversals are indicative only. A return charge alone does not establish which obligation was missed or prove a loan default. A refund or same-amount reversal alone is not treated as a bounced EMI.

15 METHODOLOGY & LIMITATIONS

- **Extraction.** Text was read locally from the PDF (Text); table columns were located from the header vocabulary and the positions of printed values. No data was sent to external services.
- **Reconciliation.** Every transaction was checked against the printed running balance (previous balance + credit − debit = balance), and opening/closing balances and printed totals were compared where available. Data is never silently corrected.
- **Categorisation.** Deterministic, configurable narration rules assign a category, the matched rule and a confidence to each transaction. Own-account transfers are matched on the holder name.
- **Income & obligations.** Recurring inflows need the same counterparty and a similar amount in at least three months. EMI obligations need the same payee and amount in at least three months. Both are estimates.
- **Balances.** End-of-day balance is the printed balance after the day's last transaction, carried forward on days without transactions; the average daily balance is the mean over calendar days.

LIMITATIONS

- This analysis is generated automatically from the uploaded bank statement only. It is not issued or endorsed by any bank and does not replace independent verification.
- Counterparty names are read from transaction narrations on a best-effort basis; banks often truncate them.
- Categories come from deterministic narration rules and are indicative, with a confidence per transaction.
- Salary-like income, recurring inflows and EMI obligations are estimates from transaction patterns, not verified income or loan liabilities.
- No credit score, eligibility or lending decision is produced. Indicators describe observed patterns and do not establish fraud, creditworthiness or default.
- The file combines 2 statement periods; they were analysed as one continuous account history.
